

Table 69. Hatchery programs that have released hatchery Chinook salmon smolts specifically for SRKW prey base enhancement, 2019–2024. Also shown are current smolt production capacities for SRKW prey base enhancement and completed site-specific ESA consultations. Releases are shown separately for those funded by NMFS via the federal prey program (N) and by the State of Washington (W). Releases denoted with an asterisk (*) were funded by the State of Washington and did not have site-specific ESA coverage at the time of release.

^a Hatchery facility, run of Chinook salmon produced (spring, summer, or fall), and age at release (SY = subyearling; Y = yearling).

^b CTWS = Confederated Tribes of Warm Springs; DPUD = Douglas County Public Utility District; LN = Lummi Nation; MIT = Muckleshoot Indian Tribe; NPT = Nez Perce Tribe; ODFW = Oregon Department of Fish and Wildlife; PTI = Puyallup Tribe of Indians; QIN = Quinalt Indian Nation; QN = Quileute Nation; SIT = Squaxin Island Tribe; TT = Tulalip Tribes; USFWS = United States Fish and Wildlife Service; WDFW = Washington Department of Fish and Wildlife; YN = Yakama Nation.

^c This column shows the maximum SRKW-related production goal identified by hatchery operators based on available capacity and, where applicable, included in the completed site-specific consultation.

^d NC = site-specific ESA consultation is not yet complete.

^e Italicized entries indicate releases for which the precise release abundance was not available at the time of writing. The 2024 release goal is shown instead.

^f The Wilkeson Creek program is managed as an extension of the Clarks Creek program and is thus included as part of the Clarks Creek HGMP.

^g Broodstock from Bonneville; all smolts released at Bonneville.
